Schweizer
Solrif Profi

CERTIFICATE

We herewith confirm that the framing of Photovoltaic modules with Solrif at:

Soli Tek cells, UAB, Mokslininku str. 6A, 08412 Vilnius, Lithuania

has been audited, processes checked and analyzed, so that the quality guidelines of Ernst Schweizer AG are being fulfilled. (*)

The above-mentioned company is responsible for the application and compliance to the production processes and is obliged to provide appropriate quality assurance measures.

Audited by: Dr. Helge Hartwig, Swen Matzat
Date: October 14th, 2025
Valid: 3 years

Julian Perrenoud
Head of R&D

Dr. Helge Hartwig
Head of Sales Solrif

(*) Proper framing ensures that the bond between the PV laminates and the Solrif frames are watertight. A professional roof construction in accordance with local roofing guidelines ensures that the roof (comparable to roof tiles) is rainproof and that no damage occurs in the event of moisture (condensation or water overflow) in the long term.
