SoliTek

If I were a carport, I'd choose SoliTek solar panels

Because your carport deserves the best

Solar Panels Engineered for Carports

Approved by DIBt
Made in Europe

Deutsches Institut für Bautechnik DIBt

Choose the Toughest of the Toughest

Sometimes due to an unsuitable roof or other reasons, installing solar panels on the house roof may not be possible.

Yet a parking space still needed.

For solar carports, solar panels are mounted directly overhead i.e. above the car, so they need to be incredibly safe and sturdy.

DIBt Certified Safety SoliTek solar panels are:

- 10500 Pa — Extreme load resistance - 10500 Pa (can hold an elephant)
- Have the highest fire resistance class A
- Up to 20% more power due to bifacial effect
- 30 YEAR GUARANTEE — Have a 30-year product & efficiency guarantee
- Made of thick 3+3 mm glass
- 50 mm — Hail resistance up to 50 mm

Deutsches Institut für Bautechnik DIBt

Due to their exceptional strength and safety, SoliTek solar panels are among the few worldwide certified by DIBt, Germany's construction technology authority.

Get Max Flexibility

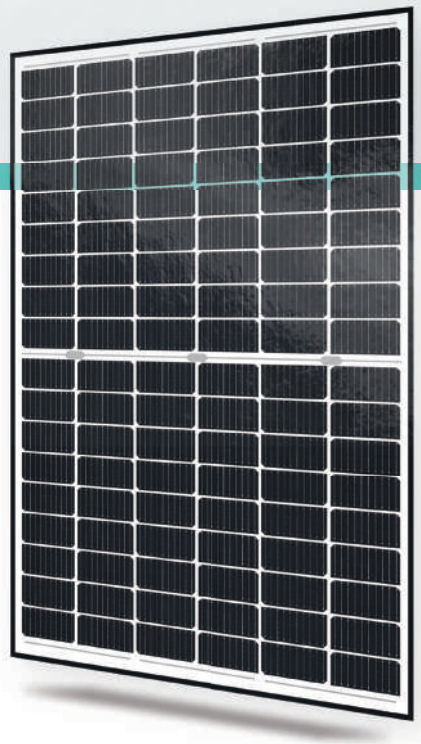

Looking for a carport with frameless modules? With framed ones?

SoliTek solar panels could be adapted to different carport customer segments:

For residential carports:

- SOLID Bifacial frameless panels
- In an elegant carport structure made from real wood for single or double-spot carports.

For commercial carports:

- A framed version of SOLID Bifacial solar modules
- In aluminum or steel construction.

But hey, it‘s up to you – if you want to go with framed modules for your private carport!

With the World's Greenest Solar Panels SoliTek solar modules are safe not only for people but also for the environment:
