SoliTek

Beyond roofs:

EXPAND YOUR SOLAR HORIZONS

Solar panels aren't just for rooftops anymore.

With Solitek solar modules every surface can be utilized to capture solar energy.

Harness the sun everywhere

IN-ROOF

Integrated Solar Solutions

PV Terrace

Solar Roof for Great Moments Outdoors

Sunny afternoons can be utilized even more effectively. A PV terrace not only protects from rain or heat but also generates electricity while enjoying the fresh air and views.

Carport:

A car shelter that pays itself

Shields against winter snow, autumn leaves, and summer heat, while offering the convenience of charging an EV at home, the office, or wherever suits the best.

Agro PV

Sustainable Harvest Boost & Protection

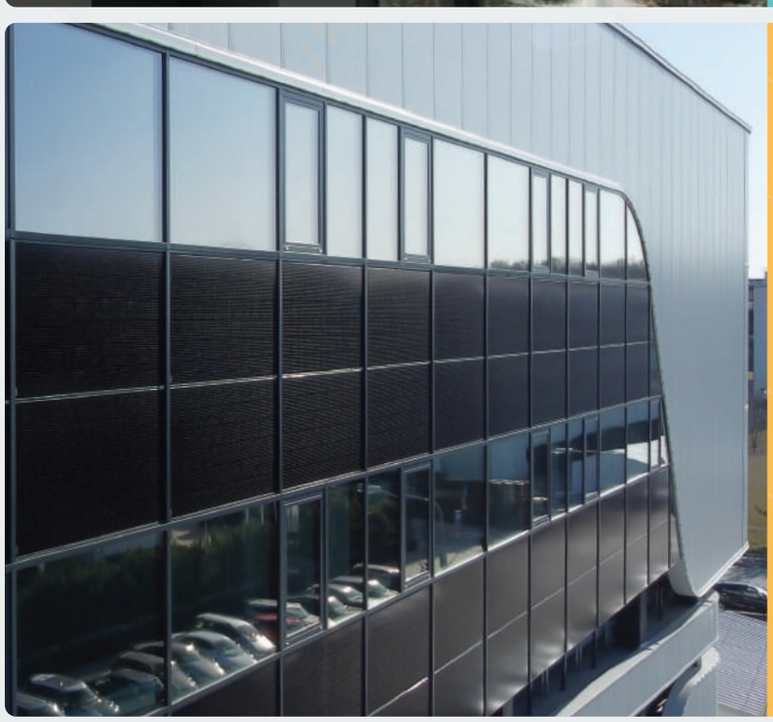

Unlike traditional solar panels, Agro Photovoltaic (PV) functions as a protective greenhouse, shielding the harvest from excessive sunlight, reducing watering needs, preventing scorching, and increasing yield.

SOLID Solrif

A Complete Solar Roofing Solution

An innovative roof-integrated solar solution that replaces traditional roofing with high-efficiency solar panels, seamlessly blending aesthetics and functionality.

SOLID Wall

the Facade, Which Pays for Itself

What if the facade of a newly built house could pay for itself? The SOLID wall solution makes it possible, turning the building's exterior into a source of green energy and slashing energy bills.

How Did We Get There?

SoliTek

SoliTek modules meet all these criteria:

They're flameproof with fire class A & Broof (t) certifications in place.

They're tough. SoliTek modules can handle:

10 500 Pa — 10 meters of snow piles up to 10,5 kPa

39 mm — Hail the size of golf balls up to 39 mm

3 600 Pa — Winds as fast as a high-speed train up to 3,6 kPa

They're among the elite, 1 of few manufacturers worldwide, holding the famous DIBt certificate.

Deutsches Institut für Bautechnik DIBt

On top of that, SoliTek solar modules are:

- Non-toxic
- Made using only renewable energy
- 98.8% recyclable
- 50 YEARS — Have a lifetime of 50 years

For all these reasons, they are the first and only solar panels in the world to have received the "sustainability Oscar" – the prestigious Cradle to Cradle Gold certification.

CERTIFIED cradle to cradle GOLD

THE FIRST AND ONLY IN THE WORLD SoliTek

This confirms SoliTek panels are safe for use anywhere – homes, workplaces, terraces, over cars, and beyond.
